Occupational Therapy Item Codes

Condition Code

A condition code can be entered in the Body Part field when you make a claim. If you include this information, a fund may store the data in the member's file. Contact the member's fund to find out if the information is compulsory.

For instructions on how to include the condition as a Body Part – see the User Guide.

Indicator Primary Conditions

- 1 Cognition - Disorders of intellectual/cognitive skills which are acquired or developmental in origin. Note: Excludes issues relating to content of thought or ideation such as cognitive beliefs or delusions.
- 2 Behaviour Issues - Disorders where the focus is on misconduct, overt behaviours and atypical responses whether of acquired, developmental or affective origin. Note: Difficult to ascribe at time because "behaviour" is common to all disorders, but this is where the behaviour issue is primary
- 3 Adjustment – Disorders where the focus is on the individual's inability to manage life events or changed circumstances.
- 4 Head and Trunk Control – Motor, neuromuscular, perceptual and sensory functions that enable the functions of head control, sitting and rolling.
- 5 Upper Limb Function – Neuromuscular, musculoskeletal and perceptual functions that enable the functions of the upper limb (including reaching, grasping, releasing and manipulation).
- 6 Lower Limb Function – Neuromuscular, musculoskeletal and perceptual functions that enable the functions of the lower limb (including standing and gait).
- 7 Neuropathic Pain – Pain which is primarily neuropathic in origin. Note: Pain associated with other dysfunction is not included.
- 8 Respiratory Function – Issues relating to optimal ventilation and gas exchange and improved exercise capacity.
- 9 Cardiovascular Function – Maintaining or enhancing exercise tolerance.
