

webPAS MARKET LEADING PATIENT MANAGEMENT FOR EVERY HOSPITAL

webPAS stands out as a cutting-edge patient management solution designed and developed in Australia and New Zealand, meeting the unique requirements of both the Public and Private healthcare sectors.

webPAS optimises patient flow seamlessly from initial interaction to discharge, and beyond, ensuring a smooth and well-coordinated healthcare journey that leads to better patient outcomes and heightened overall satisfaction; complying with MyHR Discharge Summary audit requirements.

Deployable as a secure, cloud hosted application managed service, webPAS leverages its modern architecture to scale from individual hospitals to the large enterprises and statewide jurisdictions.

Dedalus webPAS is the predominant hospital patient management solution throughout the Australian & New Zealand health systems supporting in excess of 250 hospitals.

webPAS KEY FEATURES:

Patient Administration

Consisting of a comprehensive set of seamlessly integrated functions required for effective management of patient care delivery, and organisation operational efficiency.

webPAS functions and modules cover all of your key patient management workflows including emergency, inpatient and theatres. It also includes support for prevalent high-demand services such as rehab and mental health.

Outside the Walls

Addressing the ever-evolving demands of healthcare delivery and patient expectations, a complementary suite of webPAS connected solutions seamlessly expands existing capability to provide a series of tailored, persona aware, offerings. Clinicians, healthcare and patient solutions are available in multi-form factor offerings: desktop, mobile, and tablet.

Health Department Reporting

Throughout New Zealand and the States and Territories of Australia webPAS includes many of the complex and mandatory statutory reporting requirements. Compliance continuity with annual releases.

OPTIMISE PATIENT FLOW, REVENUE, RECORD TRACKING COMPLIANCE AND MORE

Forms Toolkit

Configuration platform providing organisations the tools to drive digital transformation of clinical and operational pathways, without the need for complex or costly development.

Interoperability

Integrated into a vast array of clinical, administrative, and financial systems across hundreds of hospitals, webPAS provides a growing library of FHIR resources further simplifying PAS interoperability.

Billing and Revenue Management

Whether you are operating a public or private hospital, Dedalus recognise that revenue capture is critical for your organisation. The extensive use of webPAS throughout Australia and New Zealand has driven the most comprehensive, usable features to support our clients to manage revenue and increase returns.

Clinical Workstation

Clinical (Diagnostic) Orders and Results can be generated and accessed in real time.

CPOE (Computerised Physician Order Entry); decreasing delays in results reporting and reducing errors related to handwriting and transcription.
