

CLINICALAIDE

VITAL PATIENT INFORMATION AT YOUR FINGERTIPS

Professionals in acute hospitals across Australia and New Zealand rely on up-to-date patient information to make informed decisions. They are challenged with spending less time on record keeping and more time taking care of patients.

ClinicalAide is designed with clinicians to support clinical demand. It is a modern mobile app (IOS, Android and Windows 10) that securely provides real-time clinical information at the point of care or “on the go”. Its simple, easy-to-use interface supports faster decision-making and intervention for the most common clinical roles and pathways.

Dedalus **ClinicalAide** is a secure, intuitive clinician app delivering vital patient data to clinicians anywhere, anytime

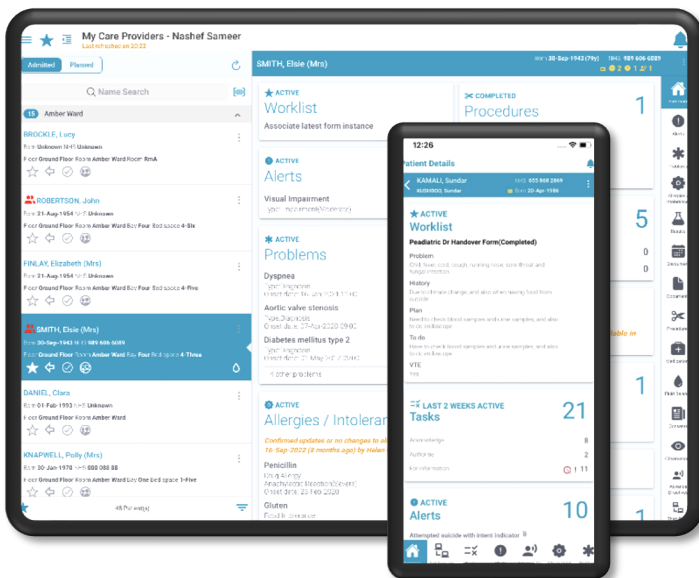

CLINICALAIDE

GET A UNIFIED VIEW OF CRITICAL HEALTH DATA, ANYTIME, ANYWHERE

BENEFITS OF CLINICALAIDE:

Improve clinician engagement: ClinicalAide has a simple, intuitive user interface that clinicians easily learn and want to use, whether they are inside or outside the hospital.

Reduced effort, better outcomes: ClinicalAide helps hospitals improve operational workflow and provide their patients with higher-quality care and better outcomes. This is accomplished by mobilising your core asset, clinical staff, which enables increased productivity and efficiencies.

Increased efficiency: ClinicalAide helps increase efficiency with instant access to patient data during ward rounds. It provides cohesive documentation across clinicians to facilitate handover. This speeds decision-making when delivering care.

Better patient management: The many resources available through ClinicalAide make it an effective tool for accessing patient information. Examples of fully integrated information sources include lab results, patient health history and medications taken.

Better patient engagement: ClinicalAide facilitates patient engagement as the clinician has more time at the bedside. With a wealth of clinical data at their fingertips, clinicians can assist patients to better understand their treatment through visual explanation of their progress and results at the point of care.

Dedalus **ClinicalAide** is a global Dedalus product available for the Australian and New Zealand market leveraging the ANZ region's most widely deployed hospital patient record, webPAS
