

MEETING THE CURRENT & FUTURE HEALTHCARE CHALLENGES

Dedalus Group is a global leader in healthcare and IT systems, supporting the digital transformation of 6700 hospitals and 5700 laboratories and analysis centers worldwide and managing more than 460 million patient records. Dedalus product portfolio ranges across the wide spectrum of healthcare ecosystems focused on Care Continuity, offering open standards-based platform solutions to help healthcare organisations deliver innovative models of care. Spanning across 40+ countries globally, Dedalus has best of breed solutions to address a wide spectrum of the healthcare eco - system. Dedalus has successfully implemented and continues to support large mission critical installations worldwide adopting international standard processes, tools and best practices.

Dedalus Care is the strategic product bundle from Dedalus for the international market. It is a proven and complete solution to support the whole healthcare organisation, embedding all processes and care settings in a single approach: from primary care to tertiary care, from revenue cycle to analytics, from virtual care to home care, spanning the continuum of care.
