Dedalus

DeepUnity Viewer

IMAGES, DATA & DOCUMENTS AT YOUR FINGERTIPS.
### Anytime. Anywhere.

CE 2862

Access multi-disciplinary content in one application

DeepUnity Viewer is the web-based viewing solution for accessing and managing examinations, medical documents and images from different specialties - localization independent.

As a registered medical device you can use the viewer for diagnostic purposes to streamline workflows, save time and resources.

Enhanced possibilities for

Radiology
- Multiplanar reconstruction
- Support of key images and presentation states
- Cine mode
- etc.

Cardiology
- Support of 12-lead, 15-lead and 18-lead ECGs
- Compare up to four different ECGs in one view
- etc.

Pathology
- DICOMIzation of slides
- Independent from WSI scanners
- Annotation tools
- etc.

Dedalus

Bringing more efficiency, flexibility and easiness in reporting solution.
