

BUSINESS INTELLIGENCE & ANALYTICS

DRIVE PERFORMANCE IMPROVEMENTS ACROSS ALL HEALTHCARE PROCESSES

BUSINESS INTELLIGENCE 4 HEALTHCARE – BI4H

CONTEXT AND NEEDS

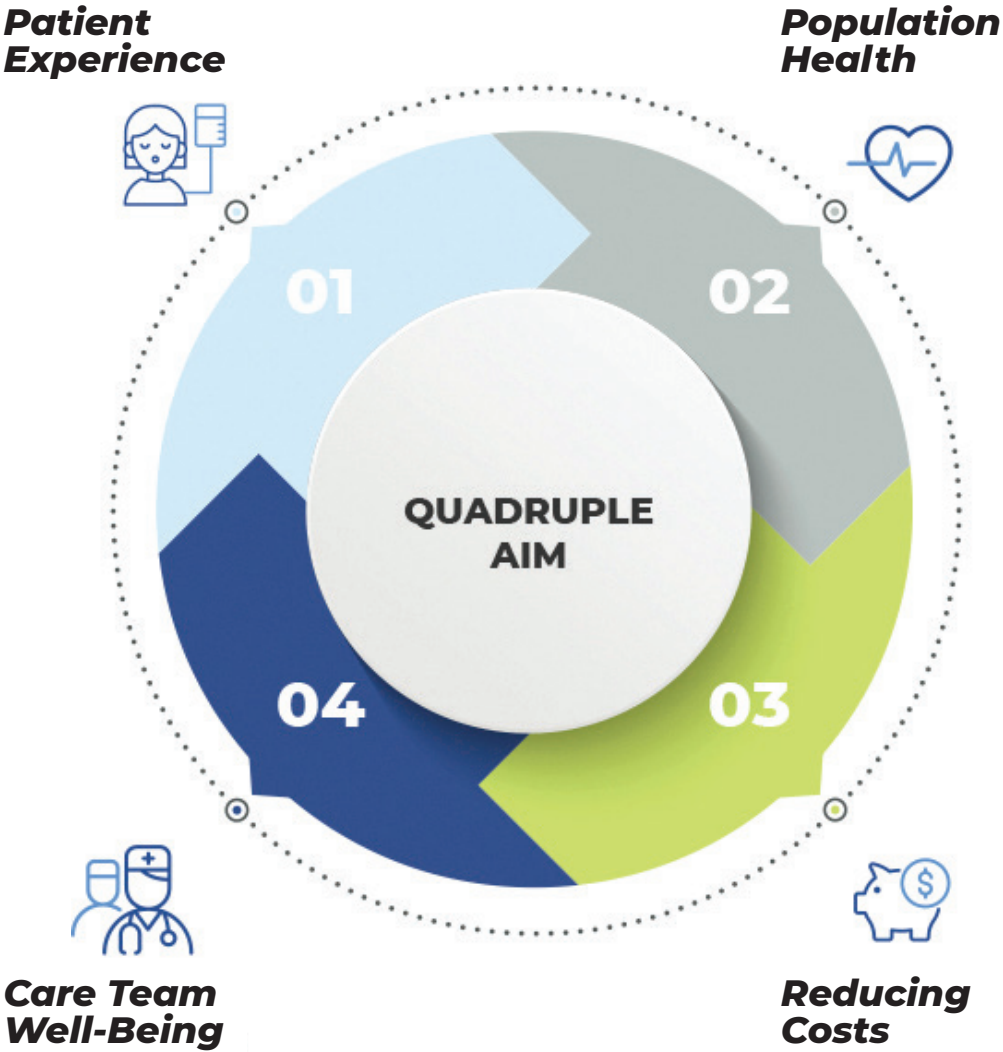

FROM REACTIVITY TO PRE-ACTIVITY

Implementing analytical methods to improve the effectiveness and efficiency of health services.

The amount of data is constantly increasing, and it is a difficult task to have effective and pre-active control over it.

Data are often:

- Fragmented
- From non-certified sources
- Non-timely available

MARKET NEEDS

How to be reached only by relevant and decisive information? A lot of data does not mean knowledge.

The effectiveness of medical care may be effectively measured using the so-called “Quadruple Aims” for High-Value Care:

- enhancing the patient and caregiver experience
- improving the health of populations
- reducing the per capita cost of healthcare
- protecting the well-being of health workers

SOLUTION

DEDALUS BUSINESS INTELLIGENCE A SINGLE PLATFORM FOR ALL INSIGHTS

A lot of non-centralised data means time consumption and ambiguity.
A single place to find statistics saves time and gives you confidence in what you are analysing.

BI4H enables:

- Detect bottlenecks in your process and take action to improve
- Align to target standards and guidelines
- Analyze trends over current and historical data
- Check anomalies in your processes by comparing similar cases
- Rely on certified results and a state-of-the-art consulting team

BENEFITS
BI4H

“A single point of contact for your reports using a web-based solution accessible from your browser”

Explore KPIs faster with our dedicated data processing technology.

- Access dashboard from everywhere using a full web solution
- Get the most of functionalities without the need of any technical skill
- Start with a full collection of Dashboards and KPIs specifically designed for Healthcare organizations
- Be proactive using event driven alerts and periodical reports
- Extend the reach of your analysis thanks to a fully configurable solution, already integrated with the most significant healthcare enterprise software

Accessible from everywhere, always

No tech skills

Ready to use

Proactive

Highly scalable

STRENGTHS
BI4H

KEY FEATURES

CUSTOMIZATION

BI4H is a proprietary platform that allows for a high level of configuration.

INTERACTIVE NAVIGATION

Interactive point & click e drill-down.

INVESTIGATIVE ANALYTICS

Workbench free data exploration, without any SQL skill required.

BETTER DATA QUALITY

Information are certified and their consistency is guaranteed by Dedalus.

ADVANCED DATA EXPORT

Report sharing in major formats: PDF, CSV, XLS, PNG, etc..

DATA SHARING

Data delivery by email for your periodical report needs and configurable automatic alerts.

CREATING VALUE

Self-service creation of apps, spreadsheets, visualizations and BI solutions with the help of machine-guided analytics, allows you to create value from your data.
