

Dedalus Makes HIMSS23 a Little Greener in Honor of Earth Month

Dedalus, a leading international healthcare software provider with a global footprint in over 40 countries, partnered with One Tree Planted to plant a tree for every connection made during HIMSS23, in honor of Earth Month.

NEW YORK (PRWEB) APRIL 28, 2023

“At Dedalus, we believe that Healthy People and a Healthy Planet are inextricably connected,” said Damon Auer, Chief Executive & General Manager, North America at Dedalus Group. “We are committed to environmental responsibility and aim to be carbon neutral by 2030. Digitizing health records is part of our mission to help our customers and partners access health information anywhere, while reducing paper consumption and waste, and contributing to a more sustainable future.”

At HIMSS23, Dedalus connected with people from more than 35 countries, and will plant trees in every one of them, including the United States, Netherlands, France, Denmark, Germany, Sweden, Norway, Italy, Switzerland and Spain, to name a few.

Why trees? Because they contribute to everyone’s health and well-being. They clean the air and water, sustain habitats for biodiversity, and create jobs for social impact. Explore Dedalus’ sustainability commitment [here](#).

One Tree Planted is a 501(c)(3) nonprofit that is dedicated to global reforestation. The organization plants trees to restore nature and biodiversity. They also raise awareness about the importance of trees, offer businesses a simple yet powerful sustainability solution, and motivate younger generations to do something positive for the environment.
