SWIFTQUEUE ENTERPRISE SCHEDULING PLATFORM

The solution can be implemented for various hospital outpatient services, pharmacy and allied health departments to manage patient flow, reduce duplications and reduce DNAs. Swiftqueue can be implemented quickly for departments and diagnostic units.

Integration with key Hospital PAS systems via HL7 and FHIR API's.

If you would like to see how these benefits can be achieved contact Swiftqueue today to arrange a demonstration.

Royal Brompton Hospital in Chelsea UK implementing Covid Vaccination for 4,000 staff.

" The thought of trying to implement a process like this without Swiftqueue doesn't bear thinking about. "

Adam Igra, Innovation Programme Director
Royal Brompton & Harefield Hospitals
