# DEDALUS COMMAND CENTER
Powering actionable data-driven healthcare organizations

DEDALUS LAUNCHES ITS NEXT-GENERATION PREMIUM DIGITAL COMMAND CENTER SOLUTION

The Dedalus Command Center provides four essential solutions for digital healthcare organisations:

1. Real-time surveillance and analysis of clinical and operational data to identify risks and exceptions.

2. Actionable measures to optimise operational capacities and reduce discrepancies in LOS, EDD, and ED attendance.

3. AI-powered rules engine that digitises KPIs, measures performance in real-time, and integrates optimal actions into workflows.

4. Instant data connectivity for quick decision-making and action.

The Dedalus Command Center offers real-time surveillance, actionable metrics, AI-powered rules, and instant data connectivity for efficient healthcare management.

THE TRANSFORMATIONAL CHALLENGE

Our integrated approach transforms healthcare organisations, improving effectiveness, efficiency, and the patient experience. The Dedalus Command Center brings digital twin experiences to modern healthcare systems, enhancing performance globally. Early client results include 20% better operating room use and 79% fewer unplanned schedules. This premium service optimises care delivery while controlling costs.

Our approach revolutionises healthcare organisations, delivering improved efficiency and patient experience through the Dedalus Command Center.

COMMAND CENTRE GUIDING PRINCIPLES

OPERATIONAL GOVERNANCE

TRUTHFULNESS:
You can trust and believe what is being presented

ACTIONABLE:
Act on what is required

RELEVANCE:
What is the current status of impacted patients/ resources/assets?

USEFULNESS:
Has utility to do something
