

Dedalus acquires AMPHI Systems: a main step for digital transformation in prehospital and health emergency management

Aarhus, Apr 15th 2021 – Dedalus Group ("Dedalus"), a leading international healthcare software solutions provider, has announced to have completed the acquisition of 100% of AMPHI Systems A/S ("AMPHI Systems"). AMPHI Systems is entirely dedicated to the digitalization of health emergency processes, from ambulances onboarding solutions to emergency departments.

The acquisition firmly consolidates Dedalus as one of the world's largest healthcare IT businesses with a broad portfolio in the clinical IT areas of hospital information systems (HIS), primary and social care, integrated care and diagnostics.

This acquisition enables Dedalus to accelerate the digital transformation of emergency and ambulance health management thanks to the complementary solutions brought from AMPHI Systems. Thanks to the acquisition of AMPHI Systems, Dedalus consolidates its leadership as a strategic player in the healthcare software industry, with a market leading position in Healthcare Information Technology across various countries in Europe. Other than Europe, Dedalus also has a strong footprint in Australia, New Zealand and several locations in Latin America, the Middle East and Africa, having a presence in over 40 different countries.

This acquisition will allow Dedalus to further consolidate and strengthen its presence in the Nordics, where AMPHI Systems has a longstanding experience in supporting national level projects for digitalized prehospital and health emergency management.

Andrea Fiumicelli, CEO of Dedalus Group, explained that: "The acquisition of AMPHI Systems will allow Dedalus to complement the wide group portfolio with solutions supporting one essential step in the care process: the prehospital and emergency field management. The fully digitalized support of emergency professionals from the very first moment they arrive on the scene is crucial for the entire process. We believe that the AMPHI Systems solutions complements effectively our portfolio in all our markets".

AMPHI SYSTEMS CEO, Knud Buus Pedersen, comments "We are very excited about the future. With the Dedalus acquisition we have secured a continued growth for our business within emergency and prehospital care. Becoming part of one of the world's largest healthcare IT

businesses will open new markets, and secure that we can continue delivering "state of the art" solutions to our existing customers as well as to new customers. AMPHI Systems has more than doubled the number of employees over the last two years, and together with all Amphi's colleagues we look forward to grow together with Dedalus”.

Dedalus is owned by Ardian, a world-leading private investment house, and in the acquisition has been supported by KPMG as it relates to the accounting and tax due diligence, Giovannelli e Associati and Moalem Weitemeyer as it relates to the legal matters.

ABOUT DEDALUS

Founded in Florence in 1982 by the current Chairman Giorgio Moretti, Dedalus is the leading healthcare and diagnostic software provider in Europe and one of the largest in the world. The shareholding structure ensures stability and great financial capacity through the presence of Ardian, the largest private investment company in Europe and the fourth in the world.

Starting in 2016, Dedalus has accelerated its expansion strategy by targeting the growing demand for innovative and comprehensive ICT and Clinical transformation solutions. With the acquisition of Agfa Healthcare IT, Dedalus consolidated its leadership as pan-European player in the healthcare software industry, with a leading position in Hospital IT (HCIS) and Diagnostic (DIS) in Germany, Italy and France. In Apr 1st Dedalus completed the acquisition of DXC's healthcare IT business , continuing its growth journey. Today Dedalus has a strong footprint in UK and Ireland, Northern Europe, Austria, Switzerland, Spain, China, Brazil, Australia, New Zealand and several locations in Latin America, the Middle East and Africa, having a presence in over 40 different countries. Thanks to its undisputed cutting-edge portfolio of leading, new generation solutions, Dedalus covers the whole spectrum of needs for healthcare operators, supporting over 6,000 hospitals and 5,000 laboratories around the world.

ABOUT AMPHI SYSTEMS

Amphi Systems A/S is part of the Judex Group which has 40 years of experience in delivering innovative solutions to the healthcare sector. Our focus is to deliver high quality and user-friendly products to the prehospital sector, as well as to hospitals. The company is a frontrunner in the prehospital space and holds a strong position in the Nordic market.

Amphi Systems office is located in Aalborg, Denmark and currently employs 22 people covering management, development, test, quality assurance and customer support.

Amphi Systems core product, amPHI – Prehospital Patient Record, is used in the entire prehospital sector in Denmark and in Region Stockholm Sweden. amPHI ensures time-critical documentation and collaboration in the harsh prehospital environment with a minimum of effort from the prehospital personnel, securing a well-documented treatment of patients and a seamless patient hand-over to the hospital.
