

# THE FOUNDATION OF MODERN DIGITAL HEALTHCARE

## Introducing ORBIS U, The Next Generation of ORBIS

**ORBIS** is **Europe's leading EPR** system, installed in over **1,000 hospitals** across Europe, supporting more than **38.5 million patients**. It is the **number one EPR** in **Germany** and **France**, measured by installed base.

Four years ago, a full functional and technological renewal began to create the **next generation** of our ground-breaking EPR: **ORBIS U**. As the newest version of the platform, ORBIS U delivers a future proof **microservice architecture**, **device independence** and a **gold-standard user experience**. ORBIS U is cloud-ready to support digital transformation and cloud-first policies.

**1000+**

Hospitals supported in  
4 EU countries

**450+**

Dedicated  
R&D resources

**25 years**

Experience of  
delivering EPRs

# ELEVATE THE HEALTHCARE JOURNEY

The goal in developing ORBIS U was to create a truly transformative EPR, streamlining healthcare processes and improving outcomes in three key ways:

Provide an integrated digital workplace that allows clinicians, nurses and care providers to manage all their concerns with one unified, intuitive system

Create a user experience that exceeds expectations in accessibility and usability as well as integrates seamlessly into every end-user's daily work, including the use of different devices depending on the user's real-world situation.

Develop a system that provides clinicians, nurses, and care providers with the workflows and tools in place to focus on delivery of care without neglecting necessary administrative documentation.

**User-Friendly**

**Interoperable**

**Compliant**

**Streamline  
Tasks**

**Device  
Independent**

**Integrated  
Solution**

**Customisable**

**Scalable**
