

Swiftqueue

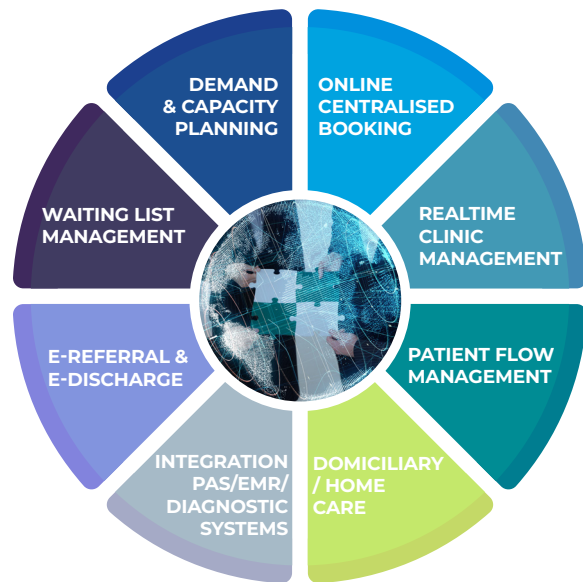

ENTERPRISE SCHEDULING FOR OPERATIONAL EXCELLENCE AND COORDINATED HEALTHCARE

RAPID AND AGILE RESPONSE TO HEALTHCARE CHALLENGES

With an ever-growing need for healthcare services, managing patients through hospitals, clinics and pharmacies can be time-consuming.

Very often, unpredictable demand and peak times result in overcrowding, disorganization and long waiting times, creating an unsatisfactory patient experience.

Swiftqueue allows for effective care coordination by providing a **user-friendly, centralized scheduler** across multiple locations and departments.

COORDINATED HEALTHCARE 24/7

Real-time capacity management, made scalable

Swiftqueue handles **millions of appointments**, addressing the needs of Acute Hospitals, community clinics and national population management when responding to mass testing, vaccinations, and screening.

We strengthen **patient engagement** and reduce appointment no-shows thanks to tailored communications.

Infusing lean techniques to streamline patient and administrative workflows and deliver value

-  **Queue waiting times: Reduction from hours to minutes**
-  **Drop in operational costs and administrative burden**
-  **Boost in resource utilisation and load balancing across a network of sites**
-  **Real-time insight on patient flow for identifying delays and backlogs**
