

Dedalus announces Amazon Web Services (AWS) as its Preferred Cloud Service Provider

Empowering Global Healthcare Systems with Scalable, advanced security features, and Innovative Cloud Solutions

Milan, Italy, 4th of February 2025 – Dedalus Group ("Dedalus"), the global leader in health software ¹, with a vast network of hospitals serving a population of over 540 million patients, has today announced a strategic collaboration with Amazon Web Services (AWS) to make AWS the preferred and recommended cloud service provider for Dedalus' solutions. This partnership aims to deliver enhanced scalability, advanced security features, and innovation, ensuring that healthcare providers can leverage cloud technology to streamline operations and provide better patient outcomes.

By selecting AWS as its preferred and recommended cloud service provider, Dedalus reinforces its commitment to driving the digital transformation of healthcare by enabling providers to adopt flexible, scalable cloud infrastructure. The partnership allows Dedalus to integrate advanced cloud capabilities from AWS that will support the development of enhanced applications for clinical workflows, population health management, and patient engagement.

Key benefits of this partnership include:

- **Enhanced security and compliance:** AWS provides robust security and compliance controls to align with stringent European and other regional healthcare data privacy and security standards, enabling Dedalus' clients to manage sensitive patient information securely.
- **Scalability and Performance:** AWS global infrastructure allows Dedalus' applications to scale efficiently, enabling healthcare providers to meet changing demands and improve overall system responsiveness.

Alberto Calcagno, CEO of Dedalus group, stated, "Our collaboration with AWS represents a significant milestone in our mission to transform healthcare systems worldwide. AWS provides a secure, resilient, and innovative cloud infrastructure that enables us to empower healthcare organizations with the technology needed to improve patient care, enhance resources, and achieve better health outcomes."

Alejandro Rasumoff, Chief of Teleradiology Department of Hospital Italiano de Buenos Aires (HIBA), in Argentina, stated, "The strategic decision to implement PACSonWEB from Dedalus, a cloud-native solution hosted on AWS, as the Teleradiology platform for the Hospital Italiano of Buenos Aires has significantly improved our business operations. Leveraging the AWS Cloud enables us to enhance agility and reduce costs compared to on-premises framework. This solution has garnered strong acceptance from our radiologists and clients, both in remote regions of Argentina and internationally."

"Healthcare providers around the globe are increasingly looking to the cloud to modernize their systems and provide more patient-centric care," said Dave Levy, VP Worldwide Public Sector at AWS. "AWS is proud to be Dedalus' preferred and recommended cloud service provider and looks forward to supporting their innovative solutions that improve healthcare delivery worldwide."

Dedalus and AWS work closely with healthcare systems, hospitals, and diagnostic labs globally to offer a smooth transition to the cloud, offering tools and services that reduce the complexity of cloud adoption. By working with AWS, Dedalus is uniquely positioned to provide healthcare organizations with next-generation cloud solutions that align with their operational, clinical, and strategic goals.
