ORBIS PAS

ORBIS PAS

THE NEXT GENERATION PATIENT ADMINISTRATION SYSTEM

BUILT ON PROVEN NHS EXPERIENCE. DESIGNED FOR THE FUTURE.

ORBIS PAS is Dedalus' next-generation Patient Administration System specifically designed for healthcare organisations across the United Kingdom and Ireland.

Combining proven healthcare workflows with a modern ORBIS user experience, ORBIS PAS helps organisations simplify administration, improve patient flow, support operational performance and establish a foundation for future digital transformation.

WHY ORBIS PAS?

Proven Healthcare Pedigree

Built using proven business logic and extensive NHS/HSE experience, leveraging established services and integrations already used in the UK & Ireland.

Designed Specifically for UK & Ireland

Addresses regional requirements including national services, reporting, patient identification standards and regulatory compliance.

Part of a Wider Digital Healthcare Ecosystem

A key component of the ORBIS platform, supporting PAS-first for full EPR strategies and a connected health and care future.

ORBIS PAS AT A GLANCE

PROVEN

Built on established healthcare expertise. NHS and Irish healthcare aligned. Mature business capability.

MODERN

Modern ORBIS user experience. Reduced clicks and simplified workflows. Dashboard-driven working.

CONNECTED

Integration and interoperability focused. Connected healthcare ecosystem. Shared platform components.

INTELLIGENT

Designed for automation and AI. Advanced analytics and insights. Future-ready architecture.

DELIVERING LONG-TERM VALUE AND SUPPORTING
DIGITAL TRANSFORMATION ACROSS THE ORGANISATION.

KEY BENEFITS FOR HEALTHCARE ORGANISATIONS

IMPROVED USER EXPERIENCE

- Simplified workflows
- Reduced clicks and administrative effort
- Consistent screen design standards
- Modern dashboard-driven working
- Improved visibility of critical information

Helping staff spend less time navigating systems and more time supporting patients.

BETTER OPERATIONAL PERFORMANCE

- Efficient patient administration processes
- Improved patient flow management
- Enhanced referral and waiting list management
- Real-time operational visibility
- Faster decision making through integrated dashboards

Supporting organisations to manage demand, maintain performance and improve patient outcomes.

SEAMLESS INTEROPERABILITY

- Integration-ready architecture
- Existing healthcare service connectivity
- Support for national healthcare services
- Shared platform components
- Foundation for connected care

Built for interoperability to create a more connected health and care ecosystem.

FUTURE-READY INNOVATION

Designed to support emerging digital capabilities including:

- Artificial Intelligence
- Workflow automation
- Advanced analytics
- Intelligent referral processing
- Predictive operational insights

Reducing administrative burden, improving productivity and supporting better decisions.

SUPPORTING NHS TRUSTS, HSE IRELAND, PRIVATE HEALTHCARE AND CARE PROVIDERS IN DELIVERING EFFICIENT OPERATIONS AND BETTER PATIENT CARE.
